PLANT AND SOIL

Contents Volume 288 Nos. 1–2 October 2006

Performance of *Bromus tectorum* L. in relation to soil properties, water additions, and chemical amendments in calcareous soils of southeastern Utah, USA
M.E. Miller, J. Belnap, S.W. Beatty and R.L. Reynolds **1–18**

Effects of water additions, chemical amendments, and plants on in situ measures of nutrient bioavailability in calcareous soils of southeastern Utah, USA
M.E. Miller, J. Belnap, S.W. Beatty and B.L. Webb **19–29**

Microbial control of plant-parasitic nematodes: a five-party interaction
L.Q. Dong and K.Q. Zhang **31–45**

Allelochemicals released by rice roots and residues in soil
C.H. Kong, H.B. Li, F. Hu, X. H. Xu and P. Wang **47–56**

Drainage and nitrate leaching in a crop rotation under different N-fertilizer strategies: application of capacitance probes
L.M. Arregui and M. Quemada **57–69**

Burial of canopy-stored seeds in the annual psammophyte *Agriophyllum squarrosum* Moq. (Chenopodiaceae) and its ecological significance
Z. Liu, Q. Yan, C.C. Baskin and J. Ma **71–80**

The invasive plant species *Centaurea maculosa* alters arbuscular mycorrhizal fungal communities in the field
D.L. Mummey and M.C. Rillig **81–90**

Nitrate influx kinetic parameters of five potato cultivars during vegetative growth
M. Sharifi and B.J. Zebarth **91–99**

A bioluminescence assay to detect nitrification inhibitors released from plant roots: a case study with *Brachiaria humidicola*
G.V. Subbarao, T. Ishikawa, O. Ito, K. Nakahara, H.Y. Wang and W.L. Berry **101–112**

Site assessment of a woody crop where a shallow hardpan soil layer constrained plant growth
G. Pracilio, K.R.J. Smettem, D. Bennett, R.J. Harper and M.L. Adams **113–125**

Carboxylate release of wheat, canola and 11 grain legume species as affected by phosphorus status
S.J. Pearse, E.J. Veneklaas, G.R. Cawthray, M.D.A. Bolland and H. Lambers **127–139**

Changes in soil phosphorus fractions in a calcareous paddy soil under intensive rice cropping
Q. Zhang, G.H. Wang, Y.K. Feng, Q.Z. Sun, C. Witt and A. Dobermann **141–154**

Fine root architecture, morphology, and biomass of different branch orders of two Chinese temperate tree species
Z. Wang, D. Guo, X. Wang, J. Gu and L. Mei **155–171**

Responses of Bradford-reactive soil protein to experimental nitrogen addition in three forest communities in northern lower Michigan
R.K. Antibus, C. Lauber, R.L. Sinsabaugh and D.R. Zak **173–187**

Soil hydraulic manipulation and organic amendment for the enhancement of selenium volatilization in a soil–pickleweed system
B. Shrestha, S. Lipe, K.A. Johnson, T.Q. Zhang, W. Retzlaff and Z.-Q. Lin **189–196**

Nutrient fluxes via litterfall and leaf litter decomposition vary across a gradient of soil nutrient supply in a lowland tropical rain forest
D.H. Dent, R. Bagchi, D. Robinson, N. Majalap-Lee and D.F.R.P. Burslem **197–215**

Effects of forest conversion into grassland on soil aggregate structure and carbon storage in Panama: evidence from soil carbon fractionation and stable isotopes
L. Schwendenmann and E. Pendall **217–232**

Effect of deep and shallow root systems on the dynamics of soil inorganic N during 3-year crop rotations
K. Thorup-Kristensen **233–248**

How do climate warming and plant species richness affect water use in experimental grasslands?
H.J. De Boeck, C.M.H.M. Lemmens, H. Bossuyt, S. Malchair, M. Carnol, R. Merckx, I. Nijs and R. Ceulemans **249–261**

Mobilization of soil phosphorus during passage through the gut of larvae of *Pachnoda ephippiata* (Coleoptera: Scarabaeidae)
X. Li, R. Ji, A. Schäffer and A. Brune **263–270**

Exotic plant communities shift water-use timing in a shrub-steppe ecosystem
A. Kulmatiski, K.H. Beard and J.M. Stark **271–284**

Soil enzyme activities and organic matter composition in a turfgrass chronosequence
W. Shi, E. Dell, D. Bowman and K. Iyyemperumal **285–296**

Amino acid uptake in deciduous and coniferous taiga ecosystems
K. Kielland, J. McFarland and K. Olson **297–307**

The use of transgenic canola (*Brassica napus*) and plant growth-promoting bacteria to enhance plant biomass at a nickel-contaminated field site
A.J. Farwell, S. Vesely, V. Nero, H. Rodriguez, S. Shah, D.G. Dixon and B.R. Glick **309–318**

Microbial Biomass, N Mineralization and Nitrification, Enzyme Activities, and Microbial Community Diversity in Tea Orchard Soils
D. Xue, H. Yao and C. Huang **319–331**

Distinctive effects of cadmium on glucosinolate profiles in Cd hyperaccumulator *Thlaspi praecox* and non-hyperaccumulator *Thlaspi arvense*
R. Tolrà, P. Pongrac, C. Poschenrieder, K. Vogel-Mikuš, M. Regvar and J. Barceló **333–341**

Genetic diversity of indigenous tropical fast-growing rhizobia isolated from soybean nodules
M. Hungria, L.M.O. Chueire, M. Megías, Y. Lamrabet, A. Probanza, F.J. Guttierrez-Mañero and R.J. Campo **343–356**

Two classification methods for developing and interpreting productivity zones using site properties
N. Martín, G. Bollero, N.R. Kitchen, A.N. Kravchenko, K. Sudduth, W.J. Wiebold and D. Bullock **357–371**

Aluminum-inhibited root growth of rice seedlings is mediated through putrescine accumulation
J.-W. Wang and C.H. Kao **373–381**
